Product Updates

Purchase-to-Pay Release 25.4.0

Version:

Published version 1.0

18/11/2025

Table of Contents

1 Introduction

1.1 How to Use this Document

The product updates offer brief, high-level descriptions of enhancements and new P2P features. They also include setup information, implementation tips to help you get started, and best practices to ensure your continued success.

2 How & When Features Become Available

Some features may affect all users immediately after the release goes live whilst other features require direct action by an administrator before users can benefit from the new functionality. Each feature listed within the release notes section will indicate the 'Availability' as either:

- Immediate

- Subject to Configuration

3 Browser Support

As a reminder, the latest version of the following browsers is supported:

- Google Chrome

- Mozilla Firefox

- Microsoft Edge

4 Release Highlights

This product update includes product enhancements including:

- Application and Company level Export event configuration history now viewable on the Web PMC

- Improved searches for Orders with Header Contracts

- Improved integrations and Commitment transaction optimisations

proactis

5 Technical Action Required – On Prem customers

As mentioned in a previous release, **due to changes to the internal signing of the executable, the new version of the Proactis Updater program must be manually installed to access the latest Proactis P2P updates when upgrading from versions prior to 25.1**. For hosted customers, this will be taken care of automatically.

6 Enhancements

6.1 Application and Company level Export Event history pages

Availability: Immediate

Description:

New **History** sections have been added to the **Export Event configuration pages** on the **Web PMC** allowing you to see a historical view of changes made to the settings.

Figure 1 – Application-level Export Event Overrides history icon available on the Application > Export Event Overrides page

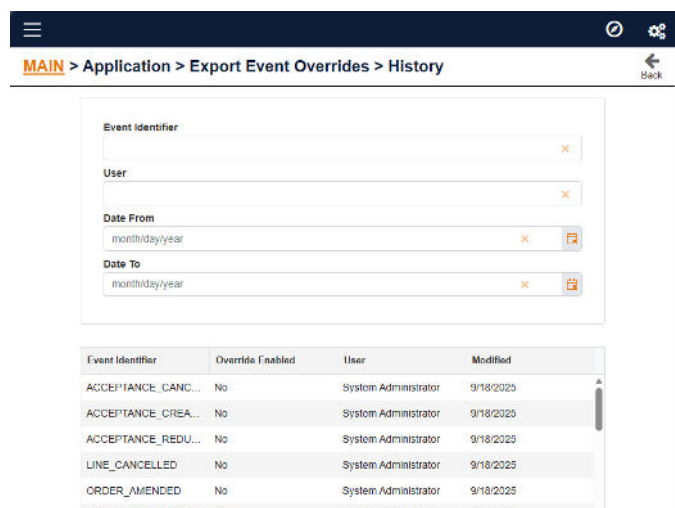

Figure 2 – Application-level Export Event Overrides history is now viewable on the Web PMC

proactis

MAIN > Company > Export Events

History   Reset Defaults   Save

Figure 3 – Company level Export Event history icon available on the Company > Export Event page

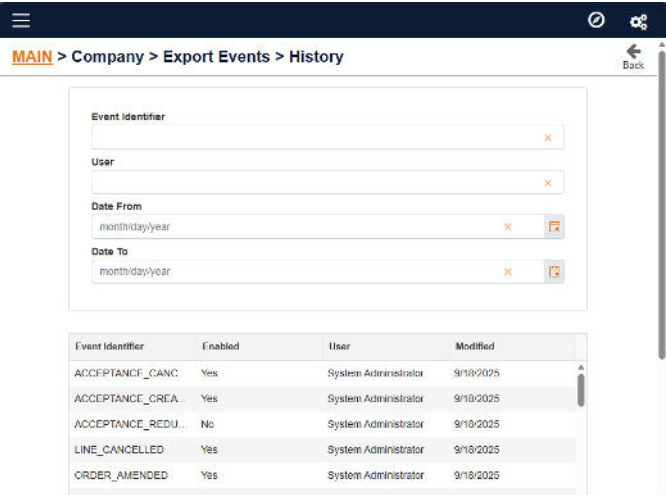

Figure 4 – Company level Export Event history is now viewable on the Web PMC

6.2 Proactis Supplier Marketplace Integration improvements

Availability: Subject to Configuration

Description:

Proactis Supplier Marketplace configuration has been improved on the **Web PMC** to allow setting up Integrations requiring authentication.

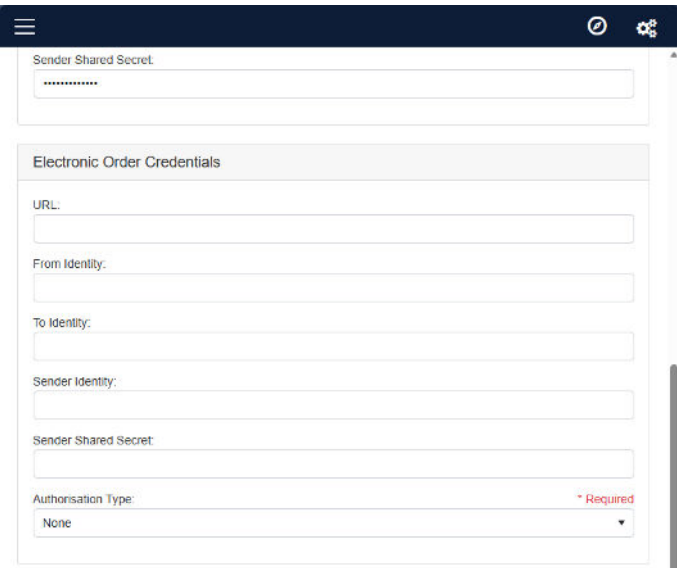

Figure 5 – Improved Supplier Marketplace configuration on the Web PMC

6.3 Orders with Header Contracts Item search improvements

Availability: Immediate

Description:

When a **Header Contract** is set on an **Order**, contract items are now excluded from all search options (**Standard Search, Navigate, Quick-List, and Favourite**). Contract items remain available when no header contract is set.

Figure 7 & 8 – Contract items are excluded on search when a header contract is set on the order

6.4 General Backend improvements

Availability: Immediate

Description:

Some general backend improvements have been made to improve current processes, integrations and performance.

1. XML Gateway enhancements

   A new documents processing function has been added to the XML Gateway to allow improved integrations between Proactis products.

2. Commitment transaction optimisations

   Multiple optimisations have been made to improve the performance of processing Commitments transactions.
