5.2	Defects	7

1 How to Use this Document

The product updates offer brief, high-level descriptions of enhancements and new S2C features. They also include setup information, implementation tips to help you get started, and best practices to ensure your continued success.

2 How & When do Features Become Available?

Some features may affect all users immediately after the release goes live whilst other features require direct action by an administrator before users can benefit from the new functionality. Each feature listed within the release notes section will indicate the 'Availability' as either:

- Immediate
- Subject to Configuration

3 Browser Support

The latest version of the following browsers is supported:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

4 Release Highlights

These are covered in detail within the Release Notes section under the following headings:

- Library Upgrades and Security.
- Sourcing Publishing Options moved to Organisation Administration

5 Release Notes

5.1 Enhancements

Library Upgrades and Security

Area: Library Upgrades and Security

Availability: Ongoing, across this and future releases

Description

A number of individual work items will be delivered across multiple releases to support the new library upgrades within Proactis S2C. Please note that the library upgrades do not affect the end user experience.

Proactis thrives to keep our applications up to date to ensure that the site you are using are protected and secure. We are working on several security enhancements and vulnerability repairs across multiple releases.

The specific updates in this release are detailed in the following table:

Reference	Description
179775,183557,231584,254423	Library Upgrades and securities

280603 – Move Sourcing Configuration "Publishing Options" Page to Organisation

Administration

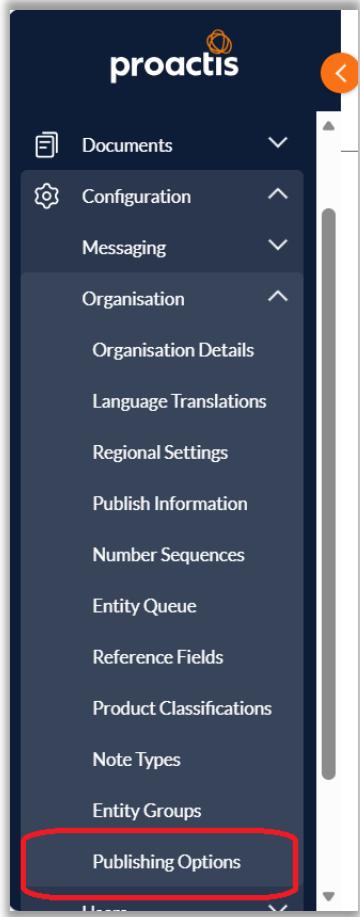

Area: Sourcing / Organisation Administration

Availability: Immediate

Description:

As a result of introducing Find a Tender Service (FTS) functionality in Contract Management there has been a requirement to make the Configuration of the Functionality available in a more central position in the system to accommodate Customers who may use Contract Management without Sourcing.

To this end, the Page to configure Sourcing Publication Options has been moved from within the Sourcing > Configuration > Configuration menu option to Configuration > Organisation Menu List as Publishing Options, shown below...

The Menu Option is made available to users from a new User Role "Maintain Publishing Options" in the Organisation Administration section of the User Roles, as below...

Organisation Administration

- Browse and maintain Entity Groups and Entry Codes
- Document Type Administrator
- Maintain Publishing options
- Organisation Administration

- ENTITYGROUPSADMIN
- DOCTYPECONFIG
- PUBLISHINGOPTION
- ORGADMIN

NOTE:

As part of this release, any User that has the Sourcing Administrator User Role will be granted permission for the new User Role above. New Users will be required to have this user Role specifically assigned.

280920 – Heap Analytics Refinements - Include User Division

Area: System Analytics

Availability: Immediate

Description:

A change has been made to the "HEAP" snippet for S2C to report on a User's Division.

5.2 Defects

The following defects have been resolved within this update:

Area	Description
Organisation Administration	Ref 280610: An error was encountered importing language translations. This has now been resolved
Supplier Network	Ref 282153: Suppliers were experiencing issues Submitting Questionnaires where Drop-down List Questions had no entries for the drop-down defined. The error handling to explain this have been improved.
