2	How & When Features Become Available	3
3	Browser Support	3
4	Release Highlights	3
5	Technical Action Required – On Prem customers	4
6	Defects	4

1 Introduction

1.1 How to Use this Document

The product update offer brief, high-level descriptions of enhancements and new P2P features. They also include setup information, implementation tips to help you get started, and best practices to ensure your continued success.

2 How & When Features Become Available

Some features may affect all users immediately after the release goes live whilst other features require direct action by an administrator before users can benefit from the new functionality. Each feature listed within the release notes section will indicate the 'Availability' as either:

- Immediate
- Subject to Configuration

3 Browser Support

As a reminder, the latest version of the following browsers is supported:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

4 Release Highlights

This product update includes the following defect resolution:

- Fixed issue preventing successful logins using Windows Auth
- Optimised handling of large commitment transactions

5 Technical Action Required – On Prem customers

As mentioned in a previous release, **due to changes to the internal signing of the executable, the new version of the Proactis Updater program must be manually installed to access the latest Proactis P2P updates when upgrading from versions prior to 25.1**. For hosted customers, this will be taken care of automatically.

6 Defects

The following defects have been resolved within this update:

Area	Reference	Description
Windows Auth Logins	283589	Fixed an issue causing Windows Auth logins to not proceed
Commitments Processing	283941	Improved handling of large Commitment transactions, including improved error handling and logging.
