5.2	Defects	5

1 How to Use this Document

The product updates offer brief, high-level descriptions of enhancements and new S2C features. They also include setup information, implementation tips to help you get started, and best practices to ensure your continued success.

2 How & When do Features Become Available?

Some features may affect all users immediately after the release goes live whilst other features require direct action by an administrator before users can benefit from the new functionality. Each feature listed within the release notes section will indicate the 'Availability' as either:

- Immediate
- Subject to Configuration

3 Browser Support

The latest version of the following browsers is supported:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

4 Release Highlights

These are covered in detail within the Release Notes section under the following headings:

Includes the following highlights:

Integration Improvements - ProContract ==> Source-to-Contract (S2C)

Description

As part of improving the ProContract and S2C connection, and building important ProContract fields in S2C, we need to make sure the data can be reported on.

This also include Fixes on the following Area: (Contract Management, Sourcing and Organisation Administrations)

5 Release Notes

5.1 Enhancements

Integration Improvements - ProContract ==> Source-to-Contract (S2C)

Description

As part of improving the ProContract and S2C connection, and building important ProContract fields in S2C, we need to make sure the data can be reported on.

The specific updates in this release are detailed in the following table:

Reference	Description
279284, 279286, 279288	Reporting Requirements for ProContract Core Data Fields – (Extensions Tab, Contract Contact Tab, Unregistered Suppliers Tab)
271475, 284648	Make ProContract Data core in Rego S2C - API Requirements
279424	ProContract "Push to CM" integration: Improved Creation of Contracts - Include Contract Status in Push function - Part 2
271506	Make ProContract Data Core in Rego S2C - Procedure to populate Core Fields from Reference Fields as part of release of functionality

5.2 Defects

The following defects have been resolved within this update:

Area	Description
Contract Management	282367- S2C - CM Variations Reporting - Issue associating Contract Number with Non-Value related Variations
Contract Management	258084 - Select all tick box on Contract KPI's tab requires a tooltip
Sourcing	283303- Sourcing Notices Grid Issue with Published OJEU forms
Organisation Administration	284301 - Reference Field Minimum Value and Maximum Value Mix Up
