# 1 How to Use this Document

---

The product updates offer brief, high-level descriptions of enhancements and new S2C features. They also include setup information, implementation tips to help you get started, and best practices to ensure your continued success.

## 2 How & When do Features Become Available?

---

Some features may affect all users immediately after the release goes live whilst other features require direct action by an administrator before users can benefit from the new functionality. Each feature listed within the release notes section will indicate the 'Availability' as either:

- Immediate
- Subject to Configuration

## 3 Browser Support

---

The latest version of the following browsers is supported:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

## 4 Release Highlights

---

These are covered in detail within the Release Notes section under the following headings:

### **Additional Support for Supplier Lot Association in Contract Management & Sourcing**

#### Supplier–Lot Association in Contracts

Users can now optionally associate suppliers with specific lots when manually creating contracts where lots are enabled but items are not. This can be configured while the contract is in Draft status.

### **P2P & S2C Integration - PO Flip attachments**

Added an integration capability that allows the P2P client to download invoice attachment data from the Hangar database. Additionally, the Proactis Utilities Azure Service has been introduced to support invoice attachment downloading.

## 5 Release Notes

### 5.1 Enhancements

#### **Additional Support for Supplier Lot Association in Contract Management & Sourcing**

- A User can create a contract manually with no items allowed but lots allowed and multiple lots are defined when adding a Supplier to the contract to have functionality to associate the Supplier with a lot from those defined on the contract.

#### **P2P & S2C Integration - PO Flip attachments**

- S2C provide an integration touchpoint to support the downloading of invoice attachment related data from the Hangar database to the caller (The P2P client)

| Reference     | Description  |
|---------------|--|
| 285861        | Manually Creating Contracts - Allow Users to associate Suppliers with Lots       |
| <b>285403</b> | Create Contract Web-Service API to support Supplier Lot Relationships            |
| 287381        | The provision of an S2C invoice attachment download REST API endpoint for P2P    |
| 287431        | Introduce the Proactis Utilities Azure Service to Invoice Attachment Downloading |

### 5.2 Defects

The following defects have been resolved within this update:

| Area   | Description   |
|--------|---|
| 282387 | Issue when creating a project with more than 1 item & pushing from Sourcing to Contract Management  |
| 287659 | Create Contract API accepts any value on the SME/VCS dropdown                                       |
| 287678 | Mismatched data when migrating ProContract data fields from Reference Fields to the Core S2C fields |
